

You're Not Alone

The Problem

Let's face it, **trying to conceive** is a big issue. At least 90 million couples worldwide, 11 million in the US alone, are trying to conceive at any given time. With only a 20% average chance of becoming pregnant each cycle, it's no surprise that couples can become stressed.

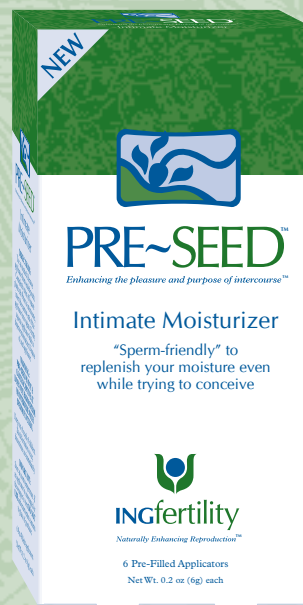

Intercourse "on demand" around ovulation can lead to anticipation anxiety and increased vaginal dryness. We all know, and studies confirm, that stress can interfere with the pleasure and purpose of intercourse. In fact, 75% of trying-to-conceive couples report an increased frequency of vaginal dryness (see references).

In relieving vaginal dryness, couples do not want to create another problem. However, **most personal lubricants and even saliva can harm sperm.** Research conducted on personal lubricants over the past three decades has clearly demonstrated the detrimental effects that these products have on sperm (see references).

The Right Solution for Your Vaginal Dryness

Pre~Seed, the first "sperm-friendly" intimate moisturizer that mimics body secretions for an optimal sperm environment.

Pre~Seed also contains a naturally occurring plant sugar that protects cell function and has antioxidant-like activity.

TRYING TO CONCEIVE?

Feelings of...

Anger

Anticipation Anxiety

Frustration

Worry

Stress about Sex

Lack of Spontaneity

Guilt

can lead to vaginal dryness.

PRE~SEED™

A "sperm-friendly"
Intimate Moisturizer™

Pre~Seed, in convenient single use vaginal applicators, to replenish moisture without harming sperm even while trying to conceive – a time of increased vaginal dryness when other personal lubricants should be avoided.

Pre~Seed:

- ✓ Designed by female reproductive physiologists
- ✓ Clinically tested
- ✓ Manufactured in a FDA registered facility
- ✓ pH balanced to semen (pH of 7.2)
- ✓ Provides silky-light moisture during sexual intimacy
- ✓ US Patent #6,593,309 B2

The pictures below illustrate the sperm-friendly environment *Pre~Seed* provides.*

Popular lubricants can create a barrier that interferes with sperm.

Sperm in Pre~Seed are able to move freely through both the semen and the Pre~Seed moisturizer.
